

FLEXO CLICHE WASH

Galaxy Flexo Cliche Wash has been specially developed for the daily cleaning of anilox rolls, both inline and offline. In addition, Flexo Cliche Wash is also extremely suitable for manual cleaning of printing plates and machine parts that are contaminated with water-based coatings.

Application: Suitable for both manual and Inline application

Flexo Cliche Wash has very good cleaning properties, is completely water miscible and low foaming

Safe for, stainless steel, aluminium, ceramic, polyethylene (PE), polypropylene (PP)

Procedure to use: For manual application, dispense the Flexo Cliche Wash in the correct concentration into a bucket or spray bottle. Apply the product to the surface to be cleaned. Let the Flexo Cliche Wash work for some time and clean the surface with a cloth or sponge. Rinse thoroughly with clean water. *(The concentration and cleaning time depend on the degree of contamination.)*

For Inline application, rinse the system with water for at least two minutes. Dispense the Flexo Cliche Wash in the correct concentration into a bucket, making sure there is enough volume to fill the system completely. Clean the system for at least three minutes. Rinse with clean water for at least two minutes. *(The concentration and cleaning time depend on the degree of contamination.)*

Product parameters:	Appearance	Transparent colourless liquid
	Specific gravity	1.00 g/cm ³
	VOC	21.0 %
	pH	11.4 ± 0.5

Storage conditions: Store at room temperature conditions and in a well-ventilated area. Keep away from open fire and heat sources.

Shelf life: In unopened, original packaging, 12 months from manufacturing date

Packaging: 20ltr jerrycan

Version: 01-2012

The information provided in this technical data sheet is to inform our customers. A successful application depends on a variety of different factors. Therefore, the advice given in this technical data sheet cannot be used as basis for claims. Our recommendation is where possible to perform tests before entering production runs. We reserve the rights to change product characteristics because of technical progress, amendment of applicable law and mandatory production related needs.
